A Focused, Resilient Portfolio

Click a location to learn more about our assets

Bakken Shale

First production: 1957

Hess Interest: ~75% for operated leases, ~10% for non-operated leases

Hess discovered oil in North Dakota in 1951 and today is one of the largest producers in the Bakken with a premier acreage position in the core of the play. Our competitively advantaged infrastructure provides transport/market optionality. We have a proven track record of applying Lean and Innovation to enhance returns.
